DAYLILIES (Hemerocallis)

In addition to our own hybrids and 1951 introductions, we offer a selected list from other growers. Shipments made after blooming.

Terms are cash with order, check, draft, or money order. Postage is paid on orders over \$5; on smaller orders add 35¢ for packing and postage.

1951 INTRODUCTIONS

These are especially selected from our seedling bed. All names except Yukon are Indian names in use in this locality.

MASSACHUSETTS -	- An eyecatcher of velvety purple maroon of recurving form, with	
	a yellow heart. No fading. For best garden effect, plant	
	between light yellow varieties, 38 in. Late July.	10.00

NEHOIDEN - Brill:	iant clear orange	flowers of flaring :	form distinguish this	
	variety. Heavy st	em, good branching.	The 30-inch height	
The second secon	makes it perfect f	or the front of the	border. Late July.	10.00

NONANTUM	40	A	rich	dark	mar	oon	with	a	golden	mid	rib	ext	tending	inte	a	golden	
			he	eart,	of	grad	eful	re	ecurvin	g for	m.	38	in. I	late .	July	7.	10.0

NORUMBEGA	-	The	basic color of deep yellow has an overlay of golden brown	
			through the center of the wide, slightly frilled petals,	
			leaving a margin and center rib of the basic tone. The	
			sepals are entirely flushed golden brown. 53 in. Late July.	

QUINEBOQUIN - A stunning variety of yellow orange with a tomato red overlay.

46 in. Late July.

SHAWMUT - The foundation orange of this flower is entirely covered by a rose flush which shades to a deeper tone at the tip of the petals; the sepals are also entirely flushed with rose. Of recurving graceful form. 35 buds. 36 in. Late July. 10.00

WACHUSETT - A fine clear flaring yellow with pointed petals of heavy substance that makes a good foil for Massachusetts. 42 in. Late July. 6.00

YUKON - A glistening yellow, deeper than Wachusetts, that is composed of a light yellow base flushed with a deeper yellow, petals slightly ruffled and recurved. A 53 inch stalk that carries 35 or more buds. Early August. Fragrant.
